

[illegible]

---

1. The first step in the process is to identify the problem or issue that needs to be addressed. This involves gathering information and understanding the context of the problem. Once the problem is identified, the next step is to define the objectives and goals of the project. This involves determining what you want to achieve and how you will measure success. The third step is to develop a plan of action. This involves identifying the resources you need, the tasks you need to complete, and the timeline for the project. The fourth step is to implement the plan. This involves putting the plan into action and monitoring progress. The final step is to evaluate the results. This involves assessing the outcomes of the project and determining whether the objectives were met.
